### Purpose

This procedure describes how Payroll Ops BE produces the monthly meal voucher order file for the electronic voucher issuers.

### Steps

1. After payroll close, export the worked-days report per employee. 2. Check that absence codes for sickness and leave are excluded. 3. Generate the order file in the issuer format and upload it before the 5th working day of the next month.

### Example

Brasserie du Parc SRL, 12 employees, 238 worked days in total in March 2026. The order file contains 238 vouchers with a total face value of EUR 2,380.00, of which EUR 259.42 is deducted from employees and EUR 2,120.58 is paid by the employer.

Corrections after upload go through the issuer portal. Log each correction in the payroll ticket.
